Subject: Transportation in Kincardine

Hi,

There needs to be a better system for taxis and mobility transportation.

At the moment I have no car and am disabled. I find it hard to get my groceries or go to appointments because either saugeen mobility has no drivers or the taxi company has no drivers.

Fred and Vick from Fred's cab company are amazing. They do what they can...but Fred needs funding to help get more drivers.

The reality is that those of us without cars...need a stable way to get around. It's not fair for us or the drivers when operators (such as saugeen mobility) either don't have the drivers because they let 3 drivers go on vacation at the same time....or not enough cabs and drivers.

Two solutions from a financial services specialist; Give a bursary to Fred's cab to fund new drivers and new cars, or have a program to help low-income families get reliable cars... simple solutions.

The town doesn't need electric buses...we need reliable transportation service from the providers we already have.
