Subject: REGDOC-2.4.5 now open for consultation

Follow Up Flag: Follow up
Flag Status: Flagged

The consultation on draft REGDOC-2.4.5, Nuclear Fuel Safety, is now open for comment. You have until January 16, 2023, to provide your input. This is the first version of the document.

This regulatory document addresses the design, operation, monitoring and safety assessment of fuel for operating nuclear facilities, with a focus on CANDU reactors. However, the requirements and guidance in the document are as technology-neutral as possible and can be applied to many technologies other than water-cooled reactors.

Consultation on this document is available through our e-consultation platform, where you can post your comments live, view other comments, and receive feedback from other users:
