

THE MUNICIPALITY OF

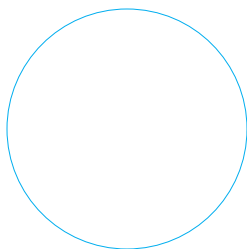

KINCARDINE

Based on Weather Conditions
your property has been identified
at risk of

Freezing Water

Municipal Staff have collected a
Water Meter reading for
billing purposes and are
requesting you begin to run
a tap **immediately.**

- Start a tap running with a constant stream about the width of the hole shown here: ●
- Ensure drain associated with flow allows water to drain away.
- This preventative measure ensures your property continues to get water.
- Shutting this off for any length of time could allow the waterline to freeze, particularly during the overnight.
- Please do not shut off when sunshine or warmer temperatures appear.
- Municipal Staff will inform you when risk is over and collect another meter read.
