

Hazard and Danger Tree Assessment

Kincardine Trails Network

Purpose

To provide Council with information:

- on greatest safety risk associated with trail use
- to assist with informed, risk-based decision making (e.g. budgeting, urgency, oversight)

Assessment Highlights

- Grey-Bruce Tree Care and Training Services, 2021
- Covered 75% of our trails
- Identified just under 900 trees (mostly Ash) that pose risks to trail users.
- Each tree given a rating
- A felling priority was recommended to support a phased approach
- Urgency - Some urgency at present; will increase with time
