

## Station Beach Washroom

Attached are photos of the existing washroom. We are planning to purchase and install wide doors with openers that's meet the FADS. A new, higher toilet with proper grab bars according to the FADS. Lower the sinks, dispensers and change the faucets to an accessible design.

Install new led lights to improve lighting in the washroom. There is also an outdoor water fountain that will be replaced.

Let me know if there is anything else. I'm happy to have any suggestions on fixtures that might be preferable or other changes to consider.

The photos attached are from the woman's side but the men's is the same.
