

Worksheet 3: Critical Infrastructure Profile

Consider the community's critical infrastructure including electricity distribution, water distribution, telecommunications, hospitals, and airports and how they relate to fire and other emergency risks in the community.

Critical Infrastructure Profile Risks	
List the critical infrastructure in your community and the fire and other emergency issues/concerns relating to each.	
Identified Critical Infrastructure	Issues/Concerns
Electricity distribution	Hydro lines go down
Hospital	Large number of immobile people at risk if a fire occurs
Telecommunications	Telephone lines/cell towers go down
Water Treatment	Loss of intake pumps
Waste Water	Removal of excess water contributing to flooding
Natural Gas Network	Line breaks creating fire/explosion hazard

Note: The information on this worksheet should be considered in conjunction with the information on all other worksheets, and not in isolation. Worksheet 10 allows fire departments to consider all of the information on all worksheets together in order to make decisions about the provision of fire protection services in their municipality/community.
