Dear Kincardine Municipality,

There are way too many foxes in the Connaught Park and surrounding neighbourhood. Some preventative action should be done before an accident happens: typically rabies. They seem to be healthy now, but this area and the park have many children playing.

**RED FOX
POPULATION EXPLOSION**
In the Connaught Park Area

TO WHOM IT MAY CONCERN
I feel a responsibility to report a fox population explosion. They seem to be healthy now, but there are so many of them that the risk level would become dangerous if rabies should ever make an appearance. They should be vaccinated or perhaps removed from the area. I live on West St. adjacent to Connaught Park. I think they are coming from down the hill in the wooded area. They are often seen running up and down the street with squirrels in their mouths. I'd feel awful if I didn't report this condition, since there are lots of children playing in the park and neighbourhood, not to mention people in their gardens.
William Coleman

Regards,
