Presentation to Kincardine Municipal Council

REDEVELOPMENT OF THE KINCARDINE SITE

AUGUST 2024

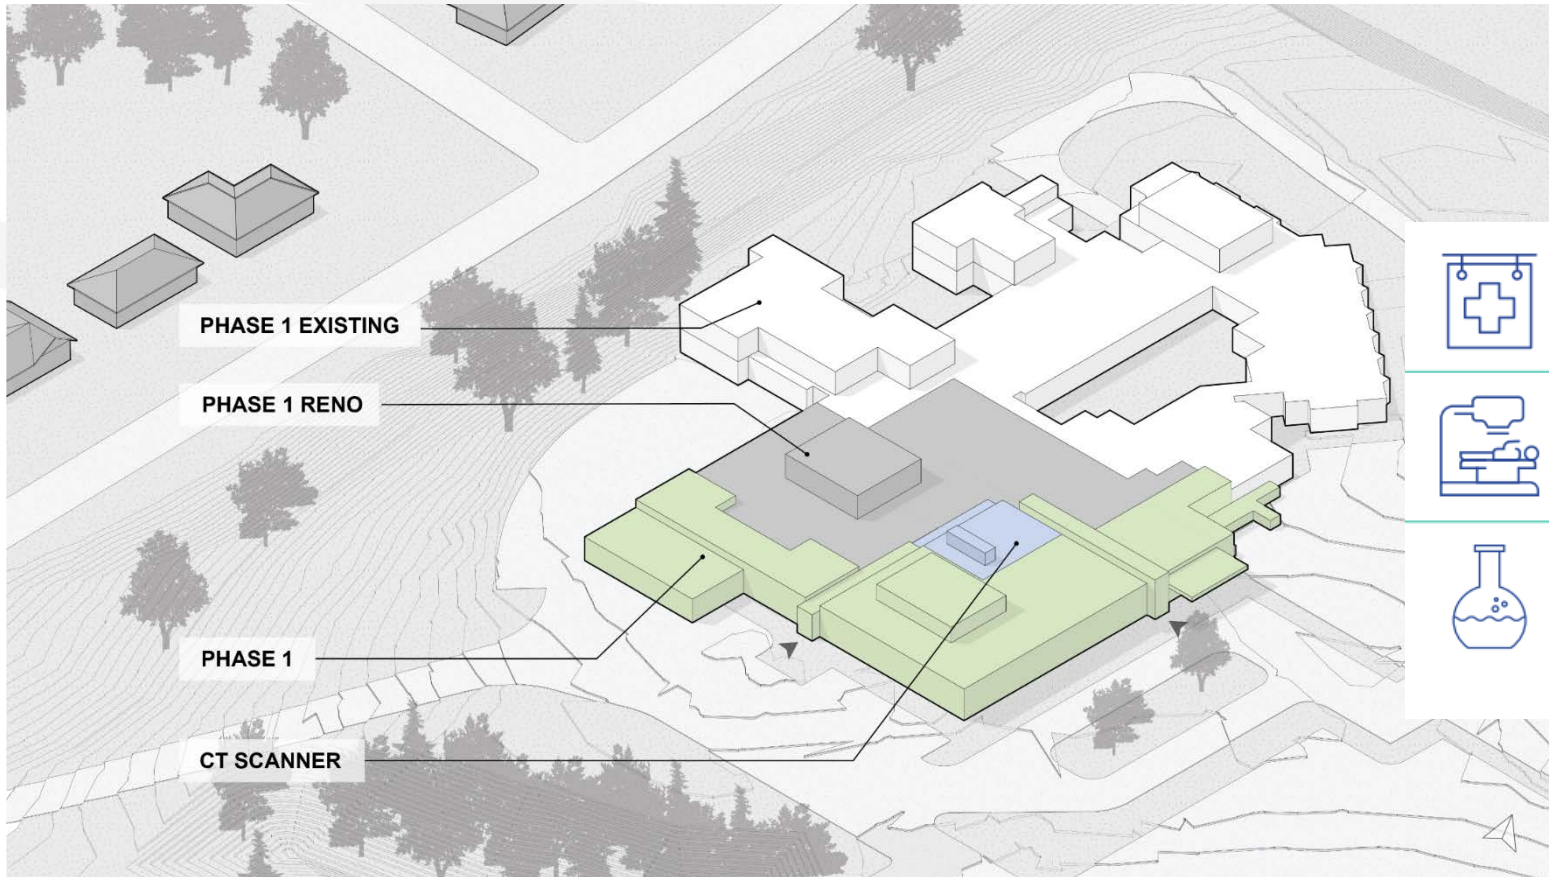

QUALITY HEALTH CARE – CLOSE TO HOME

History of the Redevelopment Project

- Four previous capital request proposals were made to the Ministry of Health in the 80's, 90's and 2000's . In 2009 SBGHC was awarded funding from the MOH to examine the best solution to better facilitate the Kincardine Hospital site.
- Another attempt was made in 2016 when SBGHC submitted a pre-capital submission, the first step in obtaining MOH approval to move ahead with the design
- In 2018, SBGHC identified the urgent need for a CT Scanner and submitted an additional pre-capital submission for a small addition to house the CT scanner.
- A 2,300 sq. ft. addition has been constructed for the CT which went into operation in the spring of 2023.
- Redevelopment was approved to move stage 3.1 in 2022 and it was submitted in 2022, however an MRI was added to the scope of the project and more work on stage 2 needed to be completed to incorporate the infrastructure needed to support the MRI program

Project Scope and Projections

15,000
Emergency room visits
(2026 projection: 19,369)

29% projected increase

19,136
Medical Imaging procedures
(2026 projection: 29,006)

52% projected increase

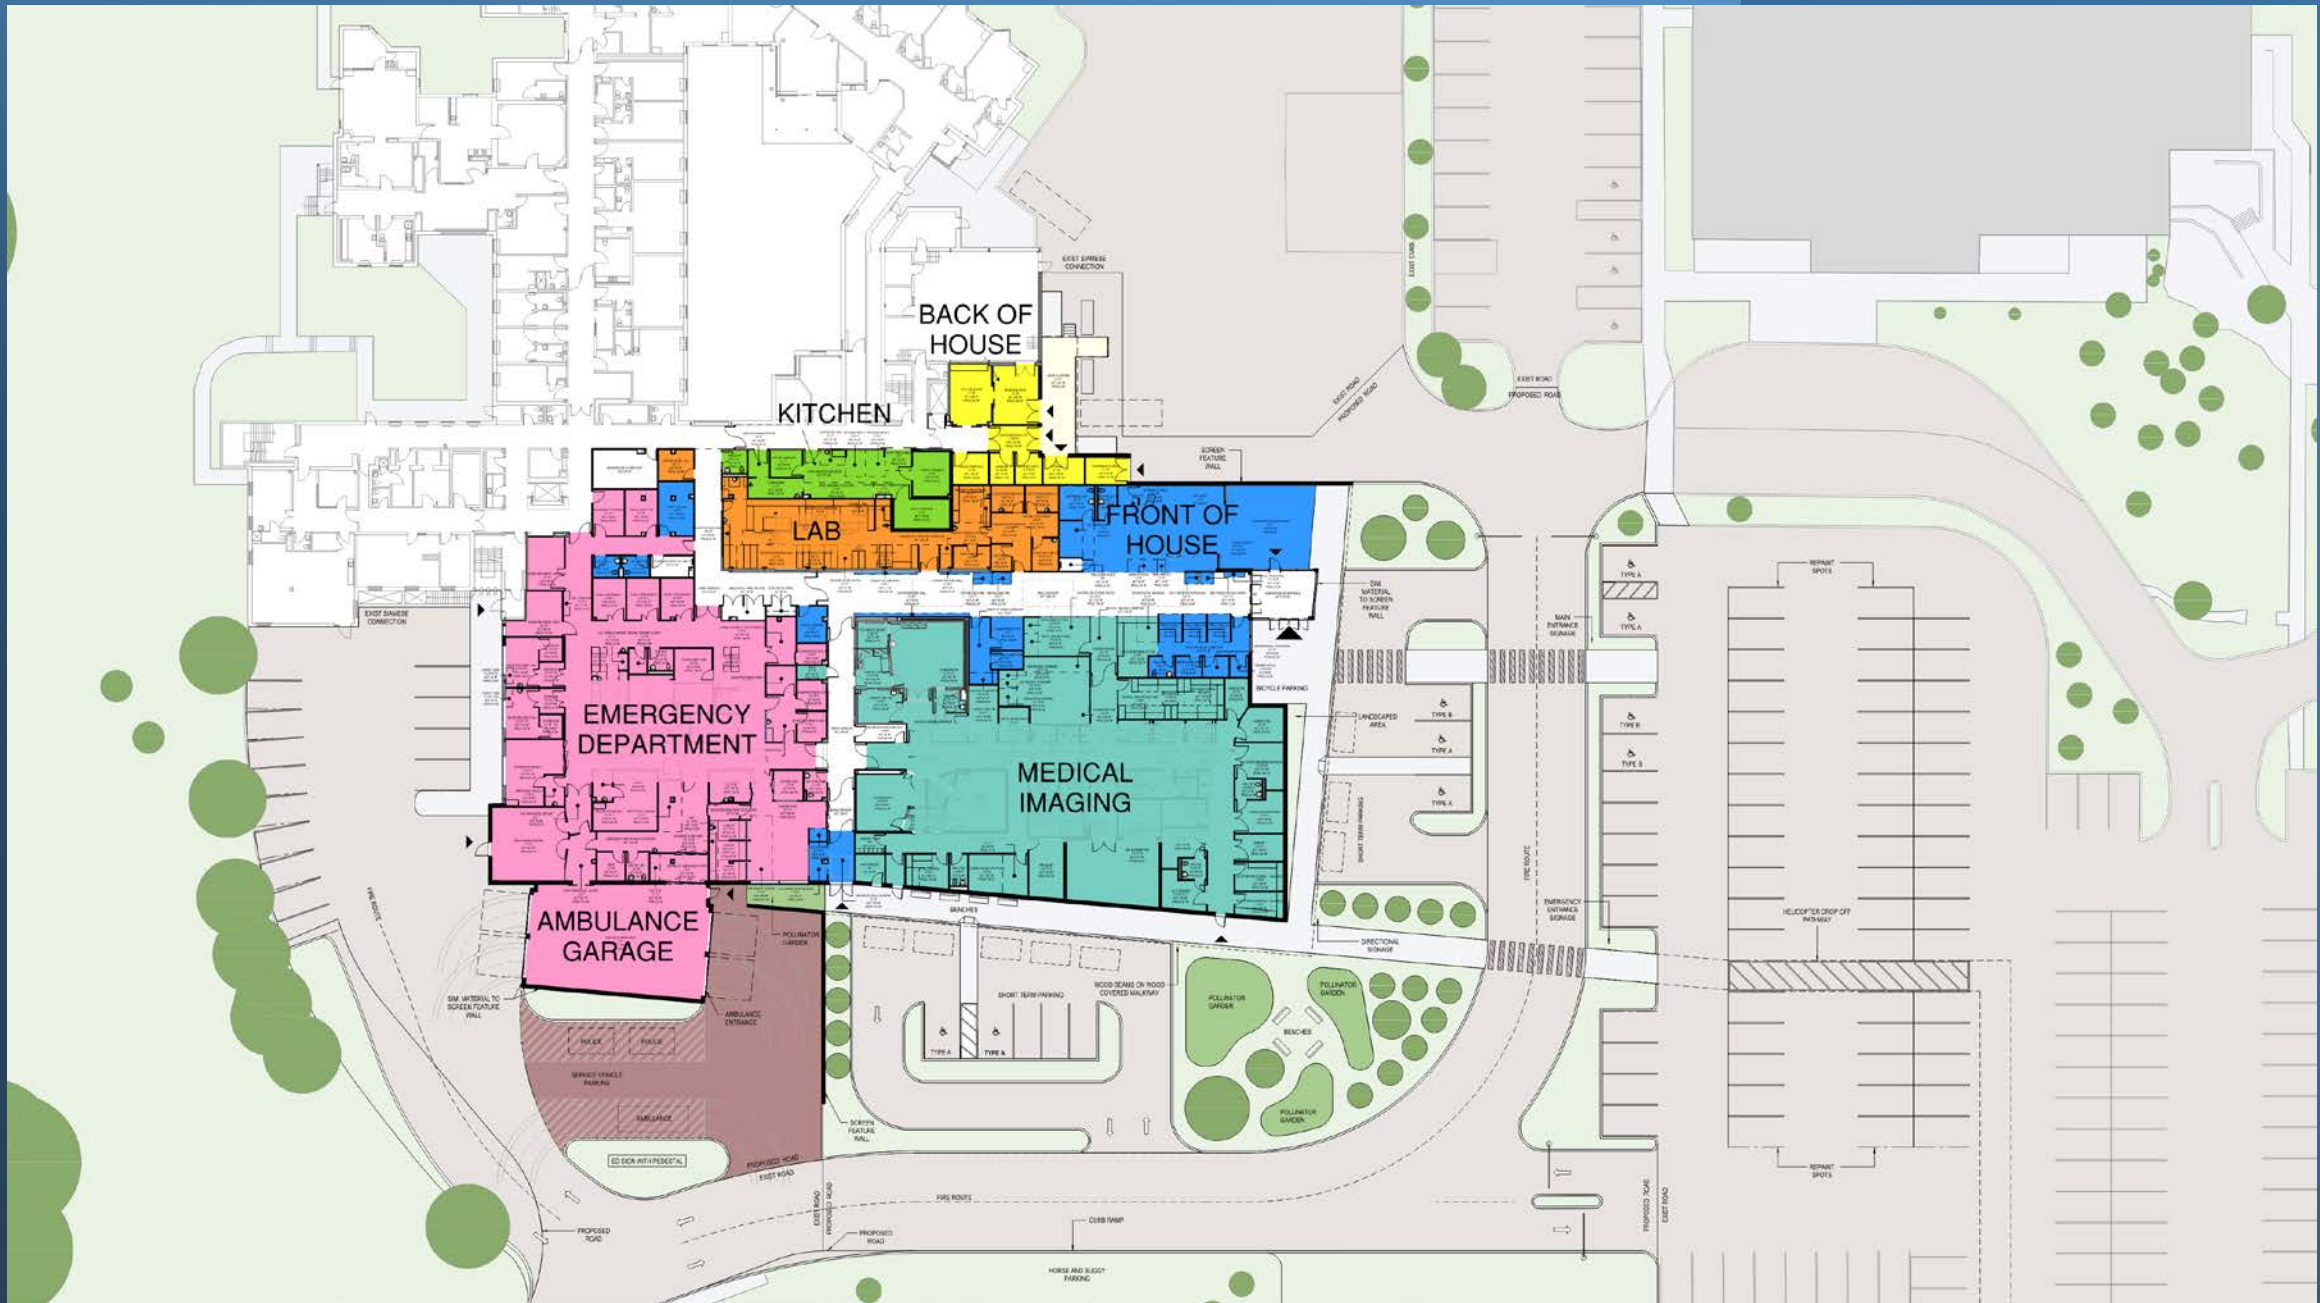

366,221
Lab procedures
(2026 projection: 853,742)

133% projected increase
