Subject: Update on the Douglas Point Decommissioning Project

UNRESTRICTED / ILLIMITÉE

Good afternoon,

We at Canadian Nuclear Laboratories (CNL) appreciate your interest in the [Douglas Point Decommissioning Project](#) and we'd like to share an update related to the project's licence amendment application.

This morning, Canada's nuclear regulator, the Canadian Nuclear Safety Commission (CNSC), released the dates for the hearing on the application we submitted to amend the current licence to a decommissioning licence. The hearing has been scheduled for June 17th and 18th of this year.

If granted, this licence would enable us to move towards further decommissioning work. However, we would still have to submit further documents and have these documents approved by the CSNC in order for the planned decommissioning work to begin. Essentially, obtaining a licence amendment is necessary, but not sufficient, for CNL to do additional decommissioning work.

For more information on the hearing and how to participate in the hearing please see the CNSC notice:
<http://www.nuclearsafety.gc.ca/eng/the-commission/pdf/NoticePublicHearing-CNL-DP-June2020-e.pdf>

For more information on our project, you can check out our web page at www.cnl.ca/dp.

Please let me know if you any questions or would like more information.

Thanks again,

Margot
